SUMMARY

Full-Stack Software Engineer with 2+ years of experience in full-stack development, specializing in Python, Django, Angular, and PostgreSQL. Skilled in building scalable, secure, and high-performance web applications. Adaptable to emerging AI technologies, including ChatGPT, Claude, and AI agent workflows, with a focus on integrating intelligent solutions into modern software systems. Seeking opportunities to leverage my technical and AI-driven problem-solving skills to contribute to innovative and efficient software solutions.

TECHNICAL SKILLS

- Languages: Python, SQL, JavaScript, Typescript.
- Web Technologies: HTML5, CSS3, Bootstrap, Angular Material, Node.js, Redis, Leaflet Js.
- Tools: GitLab, GitHub, VS Code, PyCharm, Postman, GitBash, GeoServer.
- Frameworks: Angular, React, Django, DRF, FASTAPI, PowerBI, Swagger.
- Data Management: MySQL, PostgreSQL.
- Platforms: Linux, Windows 11, Ubuntu.
- AI Tools & Assistants: ChatGPT, Claude, GitHub Copilot, AI Agents.

PROFESSIONAL EXPERIENCE

Python Full-Stack Developer May 2024 - Present
CodeRize Technologies Pvt Ltd Pune, Maharashtra

- Developed and optimized scalable backend services using Django REST Framework and PostgreSQL, cutting API response time by 40% and reliably handling 100K+ daily requests.
- Designed and implemented interactive dashboards with advanced data visualization, increasing reporting efficiency by 50% and enhancing user engagement by 30%.
- Integrated AI-driven capabilities using ChatGPT APIs, Claude, and AI Agent workflows to automate data insights, streamline content generation, and improve user experience.
- Led Agile practices, including sprint planning and backlog grooming, achieving a 20% reduction in overall development cycle time.

PROJECTS

• **Missing Person Tracking Web Application (Tracemapr.com)**

Technologies: Angular,Django,Python,REST Framework,Redis,Leaflet,GeoServer , CI/CD

- Conceptualized and implemented a real-time, map-based interface leveraging Leaflet.js for missing person reporting and tracking.
- Integrated Redis caching to enhance server performance, achieving a 40% reduction in response time.
- Developed a comprehensive backend system to integrate multiple national and state databases for rapid case resolutions.
- Designed cross-referencing algorithms, improving case resolution efficiency by 25%.

• **Auto Count Web Application (link)**

Technologies: Angular,Django,Python,Django REST Framework

- Developed an interactive financial dashboard for tracking sales, purchases, payments, and profit/loss using Angular for frontend and Django REST Framework with PostgreSQL for backend.
- Implemented dynamic charts (Sales vs Purchase, Profit/Loss, Payments Made/Received) to provide real-time business insights, improving decision-making efficiency.
- Integrated modules including Organization, Sales, Purchase, Accounting, Banking, OCR Automation, and Reports, enabling end-to-end financial tracking.
- Optimized data retrieval and visualization, supporting multiple users and ensuring smooth performance even with large datasets.

- **Access-controlled Banking System ([link](#))**

Technologies: Angular, Django, Python, Bootstrap, PostgreSQL

- Developed a full-stack web application using Angular and Django with a secure backend API for balance and statement retrieval.
- Implemented multi-tenancy, Base64 encoding, and token-based authentication to ensure data integrity.

- **YCMOU Student Enquiry Portal ([link](#))**

Technologies: Angular | Leaflet.js | GeoServer | REST APIs

- Integrated GeoServer for spatial data management and rendering institute coordinates on the map.
- Designed an interactive map interface with customized markers showing detailed institute data.
- Optimized map performance for 1000+ institutes using clustering and lazy loading techniques.
- Built a student enquiry form to streamline query submissions and data handling.
- Enhanced user experience with dynamic search and map interaction features.

- **GeoSphere ([link](#))**

Technologies: Angular | Material Design

- Built a responsive frontend by implementing lazy loading and reusable components, improving performance and scalability.
- Designed a mobile-friendly UI with Angular Material, ensuring consistent experience across desktop and mobile.
- Improved data handling using RxJS operators to manage API streams efficiently, reducing redundant calls and enhancing responsiveness.

- **Air Quality Benefit Quantification System – Abu Dhabi**

Tech Stack: Python, FASTAPI, REST API, React, Databricks, Sentry, Unreal Engine Integration

- Developed scalable backend APIs using FastAPI for a geospatial analytics and digital twin platform.
- Designed and implemented RESTful services compliant with OpenAPI 3.1 standards.
- Integrated backend systems with Databricks for real-time environmental and air-quality data processing.
- Built APIs for geospatial querying, analytics workflows, and data visualization support.
- Implemented asynchronous API handling and optimized backend performance for large-scale datasets.

- **AI-Powered Smart Report Summarizer**

Technologies: Angular | Python (Backend) | ChatGPT API | REST APIs

- Developed an AI-driven report summarization system that delivers context-aware summaries while preserving critical insights using the ChatGPT API.
- Demonstrated real-world AI integration in a production-ready Django backend with Angular frontend.
- Provided secure REST APIs for integration with dashboards.

EDUCATION

- SavitriBai Phule Pune University. AUG 2019 - JUN 2023
Bachelor of Engineering (B.E.) in Computer Engineering Ahmednagar ,MH
- Higher Secondary College (HSC). JUN 2018 - MAR 2019
Residential Junior College of science. Shevgaon ,Ahmednagar
